Minimum Distance from Protector and Rubber Glove

Do you know how to "Measure Up" your safety?

ASTM specifications require that the minimum distance between the edge of the rubber linemen's glove cuff and the edge of the leather protector cuff is 1 – inch for every 10,000 volts of A-C proof test.

Example:

A 20,000 volts (Class 2) 14 – inch rubber glove needs a 12 – inch or shorter leather protector.
