

PRODUCT SPECIFICATION

VOLTGARD High-Voltage Cowhide Leather Protector

Item Code: VLP-311

- Crafted by leather glove specialists, these leather protectors fit properly over all major brands of industry standard rubber insulating gloves and cuff style.
- Made of water-repellent grain cowhide leather to wear over rubber insulating glove.
- Feature with nylon strap adjustment and non-metallic buckle to comfortably secure the gloves to the hands.
- Hi-viz orange gauntlet cuff made of polymeric material that is easy to see and extends protection past the wrists.
- Meet ASTM Standard F696 for construction, design and materials used.
- Intended for use with Class 1, 2, 3 and 4 rubber insulating gloves

APPLICATIONS

- Electrical utilities
- Construction
- Telecommunications
- Renewable energy
- Industrial maintenance and repair
- Power generation

Warning:
Do not use leather gloves alone for protection against electric shock.
Serious injury or death will result.
Always use proper rubber insulating gloves.
